Prior to issuance of the first action on the merits and in response to the March 5, 2000 Restriction Requirement in the above-identified application, kindly enter the following amendments:

IN THE SPECIFICATION:

On page 27, insert a paragraph starting on line 30 and after the last full paragraph as follows:

-- Critical is the rate of extrudate per die area, which should be less than about 5 kg/h per mm², preferably less than 3 kg/h per mm² and most preferably less than about 0.5 kg/h per mm². High rates will result in high shear rates inside the die that will cause
